To unlock the Tele-Titan, squeeze handle and hold while pushing lock pin to other side.
 (Fig 1). Release handle.
 Ready to terminate!

### 2) Prep the cable:

A. To strip flat satin, insert thru the 2 strip blades and out past the cut side. Squeeze handle down, slightly release & hold. Pull cable out & away from tool (Fig2a). When stripping 4 or 6 conductor flat satin, re-cut conductor's to 1/4". Use cutter on cut side. (Fig 2c).

B. To strip twisted pair, insert into round stripping cavity. (Fig 2b). Squeeze handle until blade slightly cuts jacket, hold, rotate tool clockwise & cable counterclockwise. **NOTE:** scoring the jacket prevents nicking the conductors! Untwist pairs, remove kinks, configure to spec A or B. Use cutter to trim, 1/2" for Cat5e & 3/16" for CAT6.

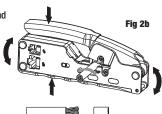

### 3) Terminate the connector:

- A. Insert the prepped cable into the proper crimp cavity/port, 8P for the RJ45's and 6P for the RJ12's and RJ11's. See (Fig 3).
- B. Make sure connector is fully seated into the crimp cavity/port and hold in position until crimped.
- C. Squeeze handle all the way down until it bottoms out. See (Fig 4). Termination is complete!

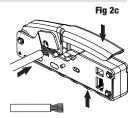

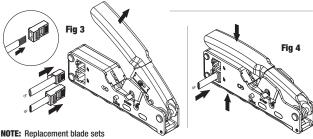

B. To strip twisted pair, insert into round stripping cavity. (Fig 2b). Squeeze handle until blade slightly cuts jacket, hold, rotate tool clockwise & cable counterclockwise. **NOTE:** scoring the jacket prevents nicking the conductors! Untwist pairs, remove kinks, configure to spec A or B. Use cutter to trim, 1/2" for Cat5e & 3/16" for CAT6.

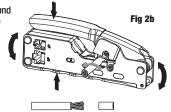

### 3) Terminate the connector:

- A. Insert the prepped cable into the proper crimp cavity/port, 8P for the RJ45's and 6P for the RJ12's and RJ11's. See (Fig 3).
- B. Make sure connector is fully seated into the crimp cavity/port and hold in position until crimped.
- C. Squeeze handle all the way down until it bottoms out. See (Fig 4). Termination is complete!

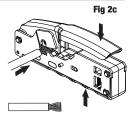

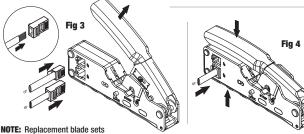

B. To strip twisted pair, insert into round stripping cavity. (Fig 2b). Squeeze handle until blade slightly cuts jacket, hold, rotate tool clockwise & cable counterclockwise. **NOTE:** scoring the jacket prevents nicking the conductors! Untwist pairs, remove kinks, configure to spec A or B. Use cutter to trim, 1/2" for Cat5e & 3/16" for CAT6.

### 3) Terminate the connector:
