9" Ergo Crimp Tool
For Insulated Terminals & Splices

The new 9" Ergo Crimp Tool represents the latest generation of crimp tool technology! The "straight plate" lower jaw assembly design eliminates critical structural stress points which are common in most competitive tools, and incorporates many more innovative features for superior performance and value.

- Tool frame accepts crimp die sets from most other popular tools. Your old crimping dies will work!
- Reduced handle grip distance makes it great for all hand sizes and allows for prolonged, comfortable use.
- Smooth ratcheted crimp cycle with a safety release and no break over hand force.
- Adjustable cam for precision ratchet adjustment, allowing for a perfect crimp, no matter the die set or application.

Applications:

- For Insulated Terminals & Splices. Typical cables are 22-10 AWG solid or stranded.
- 3 cavity, crimps insulated terminals from 10 AWG to 22 AWG.

170054

9" Ergo Crimp Tool System	Tool W/Die	Die Only
Heavy Duty Insulated terminals & splices.10 thru 22 AWG solid or stranded wire	16501	17051
Non-insulated terminals 8 thru 22 AWG solid or stranded wire	16502	17052
Coax BNC/TNC/HDTV RG59/6 & Belden 8281 /1694A (.042 / .068 / .255 / .324 Hex)	16503	17053
Coax BNC/TNC 3 Piece RG58/59/62AU (.068 / .213 / .255 Hex)	16504	17054
Coax CATV F Type 1 & 2 Piece RG59 & RG6 (.256 / .315 / .346 Hex)	16505	17055

Many other crimping die sets are available. Please call for part numbers and cross reference.

For fast die set changes, try our Quick Change Die Screws, part number 17099C (set of 2). Sold separately.
